PROJECT BRIEF:

Auckland International Airport
Auckland New Zealand
Car Park Screening
Colt Proteus PR125
Aspec Construction Ltd
Aspec Construction Ltd
Provide screening to the car park that looks good, will last, quickly and to the budget.

Budget constraints, timing and performance were the main criteria for being selected on this project. Because of the adaptability of the Colt louvre system all facets of the supply and installation were able to be strictly adhered to.

With only a matter of two months from approval of our design, to manufacture and installation of the complete system for the entire building, strict quality control was paramount.
